

The Crop Journal

Volume 14, Issue 5, October 2026

Contents

Spotlights		
1499	Beyond survival: CHPO links chilling recovery, nitrogen use and yield resilience in rice	Jin Li, Haifeng Guo, Zichao Li, Jinjie Li
1503	Decoding a sugarcane founder clone: Genomic insights for precision breeding in a complex polyploid crop	Zihao Zhang, Qibin Wu, Fei Chen, Youxiong Que
Reviews		
1507	Reprogramming, not silencing: How plant immunity is gated during legume nodulation	Li Liu, Chuansheng Wei, Hui Zhu, Yangrong Cao
1520	Pixel size and spatial scale in phenomics and enviromics modeling for precision breeding	Rafael T. Resende, Tiago Olivoto, Lucas Lemes Peixoto, João Victor B. Moreira, Marco Antônio M. Bahia, Bruna de M. Florêncio, Gustavo E. Marcatti, Alisson N.H. Moreira, Yunbi Xu
Research Papers		
1535	<i>GS11</i> encodes a microtubule-associated protein that modulates grain shape in rice	Xiejun Sun, Jinling Liu, Hongming Wu, Yimin Ling, Fan Wang, Zhihui Chen, Chen Li, Xiaokang Jiang, Yu Chen, Yun Zhu, Lianji Lu, Xiaohang Han, Wenkun Yang, Yu Zhang, Pengcheng Zhang, Cailin Lei, Xiuping Guo, Qibing Lin, Shanshan Zhu, Xin Wang, Zhijun Cheng, Yulong Ren, Jianmin Wan
1548	Sugar transporter OsSTP26 boosts rice tillering and yield through sugar accumulation	Qidong Zhu, Hongye Li, Youpeng Chen, Zhen Li, Dong Liu, Ben Zhang, Junyan Chen, Huimin Zhang, Mingjuan Li, Zhenhua Zhang
1559	The pleiotropic gene <i>LVN3</i> increases rice grain yield by modulating GA signaling to increase sink strength, source supply, and vascular flow	An Yan, Kuitian Shao, Lu Zhang, Jianlong Sun, Rongyuan Wang, Lin Tian, Laiyuan Zhai, Shumila Ishfaq, Yun Wang, Jianlong Xu
1572	The <i>microRNA399-PHOSPHATE2</i> module acts as a dual regulator of root architecture and systemic signaling under phosphate starvation in rice	Guangzhong Zhang, Zeyu Li, Shujing Kang, Chang Tian, Longjun Zeng, Tao Huang, Yiqing Tan, Fenglin Su, Quan Wang, Suikang Wang
1587	OsEREBP109 increases rice blast resistance by transcriptionally activating the RNA-binding protein gene <i>OsGRP5</i>	Bing Wang, Kunjin Zhou, Yuqiang Zhao, Lin Zhou, Jieyun Lei, Shuming Zhang, Wei Li, Na Song
1596	TaMYB72-B and TaGSK3 coordinately modulate wheat tillering through transcriptional and post-translational regulation of TN1	Hao Cheng, Zhencheng Xie, Yongtao Zhao, Guoqing Cui, Xuchang Yu, Lifan Wu, Chunhao Dong, Danping Li, Fei Du, Chuan Xia, Jiaqiang Sun, Lichao Zhang, Tianyong Zhao, Xu Liu, Xiuying Kong
1606	Map-based cloning and functional analysis of the semi-dwarf and dense-spike gene <i>Sdd1</i> in bread wheat	Xiongtao Li, Yanming Ma, Jing Liu, Qiusheng Suo, Dejie Du, Yunjie Liu, Zhaoju Li, Zhe Zhang, Sufang Li, Zhongfu Ni, Qixin Sun, Xingguo Ye, Jie Liu
1617	<i>TaPDCD5</i> negatively regulates wheat grain size and weight by modulating ROS accumulation	Guangyi Wang, Luhui Wang, Lianglong Shen, Jun Chen, Xue Shi, Jixin Zhao, Changyou Wang, Pingchuan Deng, Chunhuan Chen, Tingdong Li, Wanquan Ji
1629	GDSL WILTING LEAF1 protein confers heat, drought, and salt stress tolerance in maize by regulating vascular development	Zichao Li, Changxiong Ke, Lu Kang, Liang Dong, Lei Liu, Wanshun Zhong, Fang Yang
1642	Fine mapping of <i>qKDR3.06</i> identifies <i>ZmBAK1a</i> as a candidate gene controlling kernel dehydration rate in maize	Xiaowen Yang, Mingming Luo, Yunzheng Wang, Hao Zhang, Fangyu Zhang, Weihai Li, Wanchao Zhu, Qin Yang, Jiquan Xue, Shutu Xu
1655	The <i>BM-SZ</i> gene encoding an α/β hydrolase is essential for wax accumulation in sorghum	Candong Xiong, Xin Xiao, Jin Sun, Jiangliang Liu, Jingru Zheng, Sumeng Wang, Mengjiao Zhu, Hongwei Cai, Jun Chen
1668	Knockout of functionally redundant <i>GmDYT1</i> genes confers complete male sterility in soybean	Xiaolong Fang, Jiaxin Li, Minghui Zhou, Jing Yang, Lu Liu, Maoyan Luo, Qimei Liang, Yongdong Dai, Yi Sui, Xiqi Wu, Xiangdong Yang, Chunbao Zhang, Meina Li, Zimei Chen
1679	Integrative multi-omics reveals regulators of oil accumulation in soybean seed	Jialin Du, Jinshan Gao, Wei Zhang, Moran Bu, Xinjing Yang, Wei Zhang, Hongwei Jiang, Javaid Akhter Bhat, Xiaojian Yin, Suxin Yang, Xianzhong Feng
1690	Calcium application synergizes lodging resistance and yield potential in rapeseed by cell wall strengthening and photosynthesis	Yu Wang, Mengmeng Ge, Gengdong Gao, Dongli Shao, Guiyang Zeng, Zihui Yu, Jing Tan, Kegna Gadisa, Ying Fu, Jie Zhao, Jie Kuai, Bo Wang, Xianhong Ge, Guangsheng Zhou, Jing Wang

1704	<i>GhAKR1</i> increases salt tolerance in cotton by integrating ethylene signaling and antioxidant defense	Qiankun Liu, Mubashir Abbas, Muhammad Jawad Umer, Yanfang Li, Aiming Zhang, Yongqing Zhao, Xue Du, Quanwei Lu, Aamir Ali Abro, Xiaoyan Cai, Zhongli Zhou, Yuling Liu, Yangyang Wei, Baohong Zhang, Pengtao Li, Fang Liu, Renhai Peng
1715	Chewing insect-induced activation of NtNAC29 and NtNAC94 enhances plant defense via NtCPI8 in tobacco	Lei Zhang, Xiaotian Yan, Yixuan You, Jianping Chen, Xiaowei Wang, Ping Li
1727	Using male sterility for random intercrossing to increase QTL mapping resolution in self-pollinated plants	Xuansong Yang, Huazhong Guan, Zhiwei Chen, Damei Mao, Keyi Zhang, Likun Huang, Weiqi Tang, Tao Lan, Weiren Wu
1738	Development of wheat-tetraploid <i>Thinopyrum elongatum</i> 1E translocation lines and mapping of the adult-plant resistance gene <i>Yr1EL</i> to stripe rust	Dandan Wu, Qiong Wang, Hang Peng, Xin Zhao, Wei Zhu, Lili Xu, Yi Wang, Jian Zeng, Yiran Cheng, Lina Sha, Xing Fan, Haiqin Zhang, Yinghui Li, Yonghong Zhou, Houyang Kang
1749	Identification of the <i>QBB.hau-4A</i> candidate gene for black point resistance in bread wheat	Kefei Qu, Zhiheng Jiang, Luqian Wang, Fangfang Si, Jianwei Tang, Chunhao Dong, Zhenpu Huang, Guihong Yin, Qiaoyun Li
1760	Multi-environment sparse testing strategies improve genomic prediction of hybrid performance and general combining ability in maize	Yuan Li, Xinglong Li, Kaijian Fan, Guoliang Li, Yanfang Heng, Xuecai Zhang, Junjie Fu, Huihui Li, Liang Li
1771	GWAS-based identification of heterosis-associated genes for yield traits in maize testcross populations	Liang Yuan, Jing Liu, Jianxin Li, Shiya Zhang, Haijie Ma, Changshun Li, Chen Li, Wanyu Zhang, Yimeng Zhou, Mingjun Wang, Yibo Wang, Gaoyang Sun, Xuehai Zhang, Huiling Xie, Weihua Li, Jihua Tang, Pengshuai Yan
1783	Fine mapping and functional characterization of a CC-NBS-LRR gene underlying the bacterial wilt resistance QTL (<i>qBWA12</i>) in peanut	Xiao Wang, Feiyan Qi, Ziqi Sun, Lei Shi, Hongfei Liu, Juan Wang, Ziqiang Mo, Yuzhen Zheng, Chenyang Zhi, Lin Zhou, Stefano Pavan, Hua Liu, Xiaodong Dai, Zheng Zheng, Xinyou Zhang
1791	Exogenous strigolactones selectively suppress redundant tillers to increase phenotypic plasticity and grain yield in high-density and strong-tillering winter wheat	Ziqing Lin, Jiguo Hu, Tongyi Cao, Yuyi Zhou, Liusheng Duan
1801	Phenological reorganization and increased assimilate allocation jointly promote spike differentiation and grain number formation in dryland wheat of Northwest China	Yuan Li, Hepeng Lu, Neng Wang, Fuying Cheng, Feng-Min Li, Yong-He Zhu
1812	Layered nitrogen placement increases wheat yield by transcriptionally regulating root functional strategies and reshaping soil enzymatic hotspots	Yang Zhou, Pengjia Wu, Muhammad Fraz Ali, Xiaotian Ren, Yanjie Qu, Congwu Wang, Dong Wang
1823	Synergizing wheat yield stability and grain quality through long-term green manure incorporation with chemical nitrogen fertilization	Siyu Hou, Guocui Wang, Jingui Wei, Qiaoling Chang, Falong Hu, Zhilong Fan, Heyu Chen, Mohamed Abdalla, Pete Smith, Qiang Chai, Wen Yin
1836	Population-scale evidence for the association of stem diameter with soybean yield in the maize–soybean intercropping system	Mengda Xiang, Dan Jin, Hai Yue Zeng, Yan Zhang, Likui Fang, Hao Sun, Guoxia Zheng, Jianping Liao, Xuemei Si, Yan Zhu, Yue Zhao, Lian He, Song He, Yanru Duan, Jie Han, Xiyao Wang, Pedro Garcia-Caparros, Wenfeng Fan, Jiajun Wang, Qi He, Xing Wang Deng, Lingyang Feng, Ning Wei
1851	Monitoring of overwintering leaf age by integrating phenological, temporal, and thermal data: An indicator for assessing winter wheat seedling condition	Fangzhao Zhang, Yuhe Gao, Zixun Liu, Feng Li, Jibo Zhang, Raffaele Casa, Stefano Pignatti, Alexander Afanasiev, Zhenhai Li
Short Communications		
1862	Engineering the <i>Cat1</i> intron creates a broadly applicable <i>cis</i> -element for crop breeding and plant research	Keli Qiu, Rui Xu, Jiankai Zhou, Jun Liu, Liang Shao, Biao Xie, Yansheng Tang, Xiaojian Peng, Pengcheng Wei, Haiyang Jiang, Yunfei Li, Pengfei Jiang
1868	High-throughput identification of stripe rust resistance resources and genetic mapping of a new gene from <i>Triticum durum</i> – <i>Haynaldia villosa</i> amphiploids	Jinhong Liu, Cen Ma, Xinying Wu, Wei Hu, Haiying Duan, Ying Liu, Zhenpu Huang, Zhenjie Dong, Ruiqi Zhang, Liping Xing, Aizhong Cao
1874	Systematic mining identifies two Type I-C CRISPR systems for efficient genome editing in maize	Zhimeng Li, Yingying Wang, Yingshuang Li, Wuming Mao, Fanghui Ge, Xianguan Zhi, Meixia Yu, Zhiying Liang, Chao Bian, Shengnan Liu, Beibei Xin, Weibin Song, Jinsheng Lai, Jian Chen
1881	Characterization of <i>Pm72</i> , a new powdery mildew resistance gene on chromosome 6AL of <i>Triticum boeoticum</i> accession PI 427741	Siyuan Zhou, Qiulian Tang, Yida Wang, Shanying Zhu, Jizhong Wu, Ke Zhang, Yinghui Li, Yajun Wang, Huagang He
1886	GenoBaits Flax45K: A high-resolution, flexible liquid SNP array for genetics and molecular breeding in flax	Dongliang Guo, Leilei Zhu, Feifei Li, Yuandong Li, Mengqi Zhao, Minghao Zhang, Haixia Jiang, Kai Wei, Liqiong Xie
Corrigendum		
1892	Corrigendum to “FLASH: A high-efficiency soybean-native protoplast platform for real-time protein localization and interaction studies” [Crop J. 14 (2026) 1476–1480]	Xiuzhi Wei, Chao Qin, Ronghuan Ji, Jun Liu, Bin Liu, Tao Zhao, Hongyu Li
